

planetmagpie CLOUD SERVICES

A Secure Cloud Option, *Right Next Door*

Whether you want to move your entire IT infrastructure to the cloud, set up cloud backups or a cloud fileshare, or implement email filtering, we can help. Moving to PlanetMagpie cloud services gives you the top performing private clouds on the market and the kind of personal service you thought was a thing of the past.

Cloud Service Options

Private Cloud – Build the cloud setup you need and scale it as you grow—file servers, email, phone systems (using Skype for Business), CRM/ERP, up to your entire IT infrastructure. All without installing a single server onsite! PlanetMagpie handles all of the maintenance, security, and backups for you.

Cloud Backups – With PlanetMagpie's Cloud Backups, your data is transmitted securely from your office to our datacenter. All files are stored with automatic military-grade encryption & real-time monitoring. Backup your workstations, mobile devices, Windows Servers, Exchange Servers, SQL Databases, and virtual machines.

File Sharing – Security is paramount when it comes to file sharing. If your platform isn't built secure from the ground up, count on hackers trying to steal your files (and succeeding). Private file sharing from PlanetMagpie means you know exactly where your data is physically hosted, who manages it, and how it's protected.

Website Hosting – Get the reliable hosting your business website needs. Host anything from basic HTML to an enterprise-grade Sitefinity CMS website. Our datacenter puts each website in its own space, for maximum performance and security.

Email Filtering – Prevent spam, phishing attempts, and Denial of Service (DoS) attacks with Vircom's modusGate. Trusted by 6 million Exchange users worldwide, its constantly-evolving, enterprise-class filters keeps your entire organization safe.

Hybrid Cloud – Mix and match our private cloud offerings with your on-premise or Office 365 services. This provides greater flexibility and control over the services you offer your end users.

Advantages of Cloud Service from PlanetMagpie

Secure Access from Anywhere.

Cloud services are accessible from any location with Internet access.

Your IT Stays Put.

Relocation is much faster when you don't have to move an entire server room—just plug in and get back to work!

High ROI.

Save on in-house IT support and hardware/software costs by moving to the cloud. Convert your server room into storage space!

Made in America.

PlanetMagpie supports local vendors and uses American-made hardware and software whenever possible.

PlanetMagpie is located in the San Francisco Bay Area and Dallas/Fort Worth, and serves businesses across the United States.
