

COMPLETE I.T. FOR STARTUPS

One Partner Handling All Your IT Needs, So You Can Focus on Building Your Business

A new business needs a completely new infrastructure—servers, network, email, phones, document management, network support, desktops/laptops, web design, online marketing. It's a lot of work to manage and outsource, leaving little time for strategic objectives.

Save the effort and use PlanetMagpie's Complete IT for Startups. Our Microsoft-certified team of engineers and developers will implement the essential IT systems you'll need. All running on our most trusted business-grade IT hardware and web solutions. Brands like Microsoft, IBM, Juniper, Extreme & Telerik.

FEATURES

With our Complete IT for Startups, each of our divisions handles different parts of your IT setup. Implement any or all services. Your IT is hosted in a private cloud in PlanetMagpie's Silicon Valley datacenter.

IT Consulting Division

- Windows Server 2012
- Exchange 2013 Email / Unified Communications
- VoIP Telephone System with Lync Server 2013
- Document Management

Network Support Division

- Network Setup
- Desktop, Laptop and Mobile Setup
- Printers, Copiers, Scanners
- Graphics and Video Equipment
- Network Support: Onsite or Remote

Web Development Division

- Identity Creation and Branding
- Website Design/Development (CMS & Ecommerce Options)
- Online Marketing: SEO, Email Marketing, Copywriting, Social Media Consulting
- Web Hosting

PRIVATE CLOUD SERVICE ADVANTAGES

- » Hosted Windows Server 2012: the power of a big business in a small box
- » Hosted Lync Server 2013 VoIP System: run your phone system through our datacenter
- » Hosted Exchange Server 2013: all the benefits of Exchange 2010, plus email archival and discovery that includes search scopes for Lync and Sharepoint, as well as Exchange
- » Hosted SharePoint 2010: document storage and management, secured in your private cloud

A private cloud for your startup means your own hosted server. You use it; no one else. Safety and performance. Plus, running your IT services through PlanetMagpie reduces hardware, power, on-site support costs and setup time. So you can focus on growing the value of your new business.

BENEFITS

- » One company to interface with—from architecture to installation to billings
- » Package Pricing from our manufacturer partners—leverage your purchasing power
- » “Green” power savings—our hosted options save on power and hardware
- » Award-winning web design team to give your company a successful look and feel from the start
- » Website content management system to give you immediate control of your website
- » Network Support and Web Maintenance SLAs for ongoing support of your new systems

Microsoft Small Business Specialist
