Scalable

Seamless

Accessible

Hosted Locally

YOUR BUSINESS ON THE CLOUD

If you're considering moving one server or your entire IT infrastructure to the cloud, consider PlanetMagpie's Private Cloud.

PlanetMagpie offers private, not public, clouds to its business customers. Why? Because they offer the security your data needs. With "public cloud" solutions, your servers are hosted on a shared platform with dozens, potentially hundreds of other hosted servers. But with a private cloud, all your servers are hosted on their own private platform, with a connection directly to your offices.

PlanetMagpie's Private Cloud Service allows you to build whatever setup you need and scale it as you grow—file servers, email, voice communication, CRM/ERP, custom applications, etc.

CREATE YOUR PRIVATE CLOUD WITH THESE MICROSOFT SOLUTIONS, AND MORE!

Hosted Windows Server 2012

Run any organization from small business to enterprise with the industry standard Windows server—includes Active Directory, built-in security, and remote management.

Hosted Exchange Server 2010/2013

Secure Exchange-based email setup (with email archival and discovery features), running entirely offsite.

Hosted Lync Server 2013

Run your phone system through our datacenter, complete with VoIP, IM, presence, and video conferencing using your existing phone numbers.

Hosted SharePoint 2013

Secure document storage and project collaboration spaces.

Hosted ERP

Your company's financial data, backed up nightly in our datacenter.

THE DATACENTER

PlanetMagpie's datacenter features top-of-the-line servers by IBM, network hardware by Juniper and Extreme, redundant communication lines with burstable bandwidth, and redundant power. Best of all, our datacenter is located right here in Silicon Valley, along with all our employees, allowing you to visit your servers (and us) any time you like!

MICROSOFT CERTIFICATIONS

PlanetMagpie is a Gold-level Midmarket Solution Provider with hosting competencies including: Identity & Security, Server Platform, Search, Content Management, Web Development, Digital Marketing, and Portals & Collaboration.

BENEFITS

- » **Secure Access from Anywhere.** Cloud services are accessible from any location with internet access.
- » **Your IT Stays Put.** Relocation is much faster when you don't have to move an entire server room—just plug in!
- » **Backups.** Provided with Microsoft Data Protection Manager, reducing your costs for tape and disk storage.
- » **Speed.** No loss in server speed compared to your local server response time.
- » **Network Support.** PlanetMagpie's engineers & techs will gladly assist you with any local or remote user issues.
- » **High ROI.** Save on in-house IT support and convert your server room into a storage closet!
- » **Made in America.** PlanetMagpie uses local vendors and American-made hardware whenever possible. We make a conscious effort to rely on businesses who don't offshore manufacturing & services.
