

## Secure file sharing for today's 'work anywhere' workforce

Powered by eFolder's Anchor, PlanetMagpie's Private Cloud Fileshare is a file sharing, synchronization, and backup solution for small and mid-market businesses. With its Dropbox-like user interface, your team can access and share files securely from anywhere using any device.

### PlanetMagpie's Private Cloud Fileshare

256-bit AES encryption, highest security level of any cloud platform  
Perform remote data wipes for stolen/lost devices  
HIPAA Compliant

Access and sync files on all devices (Windows, Mac, iOS, Android)  
File Server Enablement—cloud-enable your file server  
WebDAV Mapped Drives—modify documents in your web browser

Dropbox-like interface with drag and drop  
File Sharing among internal and unlimited external users ("guests")  
Version History—"roll back" to old file versions in case of accidental overwrite

Integrates with Microsoft's Active Directory for Single Sign-On  
Manage users, files and shared folders through a simple admin interface  
Reporting—view bandwidth consumption, available storage, and more

Backup selected folders or your entire computer to your Anchor cloud  
Backups run in real-time while you're online

#### PlanetMagpie - Providing the Advantages of Truly Private Fileshare

- No server hardware to purchase or maintain
- Store and share any file type of any size
- Easily access all your files from anywhere, from any device
- Branded web UI and custom URL
- Local file updates sync immediately
- No more large email attachment issues—just send a fileshare link
- "Lock" files while editing to stop others from overwriting your changes
- Automated backup of client devices prevents you from losing files even if your computer crashes
- Use Team Share Folders to share project files with your colleagues
- Use Guest Accounts to share files with people outside your network, and protect them with file expirations

### Why Choose Anchor Over Dropbox or Google Drive?

Anchor offers more security and privacy, personal service and support, and continuous backups to our cloud datacenter.

### The Datacenter

PlanetMagpie's datacenter features top-of-the-line servers by IBM, network hardware by Juniper and Extreme, redundant communication lines, and redundant power. Best of all, our datacenter is located right here in Silicon Valley. You can visit your cloud (and us) any time you like!

#### Pricing\*

Fileshare with Workstation Backup	\$35/month per user
Fileshare Only	\$25/month per user
Workstation Backup Only	\$15/month per user

Minimum 8 users. No maximum user limit.  
All customers receive 750GB of cloud storage.

\*Plus one-time setup fees
